MISSION

The mission of the Department of Labor is to help build a stronger, more competitive Louisiana economy. We accomplish this by building a well-trained quality workforce, supporting the human capital needs of Louisiana businesses, providing economic security for unemployed and injured workers, and promoting a safe workplace.

The total cost of publishing 400 copies of this public document, including first printing and reprints, was \$257. This document was published by the Louisiana Department of Labor, Office of Occupational Information Services, Research and Statistics Division, P.O. Box 94094, Baton Rouge LA 70804-9094. Its purpose is to disseminate information pertaining to labor market developments and employment trends under the authority of Part 602.6, Title 20, and Chapter V. of the Code of Federal Regulations. It was printed in accordance with the standards for printing by state agencies established pursuant to R. S. 43:31.

OFFICE OF OCCUPATIONAL INFORMATION SERVICES

Dear Reader:

The *Louisiana Labor Force Diversity Data 2005* provides you with a useful tool in developing employment profiles for your company compared to the surrounding labor market areas. Data contained in this book are also relevant in applying for grants using the latest population and labor force demographics.

The 2000 census population and labor force by race and sex have been incorporated in this publication. The Louisiana Department of Labor will provide additional updates to this publication and future reports as further census data become available.

The current publication may be downloaded from the Department of Labor's Web site at www.LAWORKS.net, by scrolling over Labor Market Information, then clicking on Publications and Reports. Next, scroll down the page until you see the current list of available publications. This book is in a PDF file and can be opened by first clicking on the Adobe Acrobat link to access the software.

Users may request a CD of this publication by contacting us at 342 – 3141 in the Baton Rouge area or by dialing (888) 302-7662.

This publication is intended to serve as a tool in providing strategic labor force and population demographic information.

Sincerely,

John Warner Smith
Secretary of Labor

TECHNICAL NOTES

This publication has been prepared to meet the numerous employer requests for population and labor force data by sex, race, and ethnic group for the state, metropolitan statistical areas (MSAs), and individual parishes. Tables included meet the basic requirements of 41 CFR Part 60-2, Subpart B, (Purpose and Contents of Affirmative Action Programs.)

Population (pages 1 – 6):

The latest census estimates are used to provide race and sex demographics of the population of the state and each parish. The 2000 census figures are incorporated in all population tables from the May 2002 publication forward. Between each ten-year census period we receive annual population estimates at the state and parish levels from Louisiana Tech University, Research Division of the College of Administration and Business. These population estimates are used for total population and the latest census population ratios for race and sex are applied to the annual population figures to produce estimates by race and by sex.

Labor Force (pages 7 – 24):

Data were derived from the monthly Current Population Survey (CPS) conducted of approximately 60,000 households across the United States. The Bureau of the Census conducts this survey for the Bureau of Labor Statistics (BLS). The Local Area Unemployment Statistics (LAUS) program is a Federal – State cooperative endeavor that provides monthly and annual labor force, employed, and unemployed data at the state, Metropolitan Statistical Area (MSA), and parish levels by place of residence. The sample size for Louisiana has remained between 500 and 600 households for several years because of the lack of substantial population growth in the state. With a sample this small we are unable to produce data by race or by sex for the labor force on a monthly bases. We must use the same methodology stated above for estimating the race and sex of the population (using the latest census ratios applied to the annual average labor force for the state and each parish). Because of the small sample size data users are cautioned when using labor force figures as a sole economic indicator of an area.

The **labor force** figures represent individuals 16 and over who were either working or actively looking for work during the reference week (the 12th of the month) of the survey.

Employed refers to those individuals 16 and over, who reported that they were working during the reference week of the 12th of the month.

Estimated **unemployed** are derived from those individuals 16 plus years, who responded that they were not working but were actively looking for work during the reference week of the 12th of the month.

To compute the estimated employed for an area, subtract the number of unemployed from the civilian labor force figure. To compute the unemployment rate for an area for males or females on pages 17 through 24 divide the number of unemployed by the civilian labor force estimate, then multiply by 100.

$$\text{Number Unemployed/Total Civilian Labor Force} * 100 = \text{Percent Unemployed}$$

Occupational Breakout of Civilian Labor Force by Sex and Ethnic Group (pages 25 - 97):

Detailed statistics on the breakout of the labor force by occupation, sex, and race are also a ten-year census product. Census ratios were used to calculate the number of persons by occupation, sex, and race in the labor force for each parish, Metropolitan Statistical Area (MSA) and statewide. The latest available annual average labor force estimate for each area was then multiplied by the census ratio. We have incorporated the 2000 Census data by occupation with this 2004 publication. The census data was obtained by a special request to the U.S. Census Bureau, who in turn had to get approval from their Disclosure Review Board (DRB) to release data at the level of specificity that we requested. As you will note, because of more stringent confidentiality standards, many parishes have zero instead of the labor force figures by race and sex due to the DRB mandate that there be at least a weighted sample of 50 in each category of an occupation before it can be published. This also explained the difference between the figures for the civilian labor force 2004 annual average and the total civilian labor force by occupation. Since these data were compiled using ratios some totals by occupation do not sum because of rounding. The Bureau of Labor Statistics establishes the occupational classifications used in the SOC (Standard Occupational Classification) coding system.

Job Center Registrants:

Data for this section of the publication will not be available this year. Occupations of active job applicants through the Louisiana Department of Labor's web system will be included in future publications as soon as it is available.
